Recommendation Letter

To Whom It May Concern:

Global Service+ Ltd. was a subcontractor for Chemonics Georgia, implementing the USAID-funded New Economic Opportunities (NEO) Initiative program. Global Service+ Ltd. was first contracted in July 2013 to provide design and rehabilitation works for the potable water supply systems in Shindisi and Zegduleti villages of Gori Municipality. Under the subcontract, Global Service+ Ltd. cleaned the existing borehole; installed a pump and new water reservoir tank (V=25m³); and replaced 170m main pipeline in Zegduleti village. In Shindisi village, the subcontractor replaced 1,110m of damaged metal pipes with polyethylene pipes and installed a common tap according to the developed and approved design documents.

In June 2014, NEO again contracted Global Service+ Ltd. to provide rehabilitation works on the agrarian market in Tsitelsopeli village of Choporti community in Dusheti municipality. The subcontract is currently active and Global Service+ Ltd. is installing open and close-sided commercial markets stalls and improving market grounds in the Tsitelsopeli village.

Global Service+ Ltd. has rehabilitated the two potable water supply systems in Gori Municipality and is currently rehabilitating the agrarian market in Dusheti Municipality in full satisfaction and compliance with the subcontract terms signed between Chemonics Georgia and Global Service+ Ltd. under the NEO project.

Sincerely,

Kirk Ramer
Chief of Party
New Economic Opportunities (NEO) Initiative
