

Support to the development of Red Bridge Border Crossing Point

Recommendation letter

“Global Service+” LTD was a contractor of United Nations Development Programme for 2 years (2016-2018).

First contract #105/12/2016, phase I, for the “Construction of Border Inspection Point for Sanitary, Phyto-Sanitary (SPS) and Veterinary Control at Red Bridge (BCP)”, was concluded with “Global Service+” LTD on 12 December of 2016 and second contract #066/12/2017, for the phase II of the construction, was concluded on 15 December of 2017.

The UNDP confirms that “Global Service+” completed works successfully and safely, which included variety of construction works, such as: earthworks; reinforcement structure; internal and external walls & finishing works; screeding & flooring works, roofing works; internal & external water and sewage system installation; retaining walls; boiler building installation; external HVAC system; arrangement of reinforced concrete cover; internal & external electrical installation works; weak power network installation works; fire alarm system installation, as well as, engineering support (shop drawing development), technical advises and etc.

“Global Service+” LTD fairly fulfilled requirements and duties set by the contract, swiftly and efficiently overcame challenges in the course of works and performed its works in a qualitative manner in accordance with budget and safety rules envisaged by the project.

Best regards,

Grigol Pantsulaia
Project Manager
